ZKTeco

BioTime web

Time Management **Plug & Play** Solution

BioTime Web is the most innovative and simple 'Plug & Play' solution for employee time management.

The solution is based on ZKTeco's **Biopad**, a multi-purpose Android OS data collection terminal. Biopad, with a 7" touchscreen and available in fingerprint, proximity and combined versions, incorporates a T&A application for the configuration and management of employees and their working schedules.

The uniqueness of the solution is that the Biopad comes with an integrated **Webserver**, an online time management application capable of managing all terminal data in real time through a web browser, allowing you to visualize and manage your employees' schedules from anywhere without the need of any added software.

Employee Management

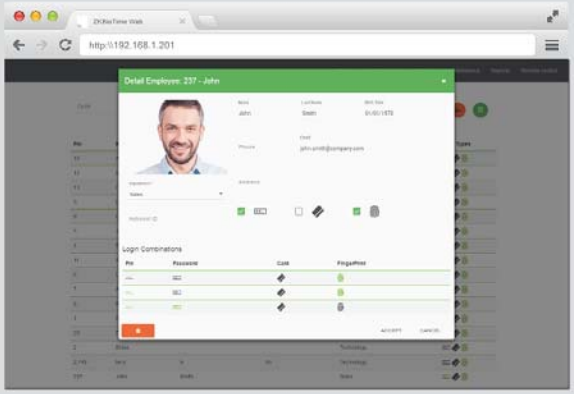
Real-Time Monitoring

Data Export to Excel

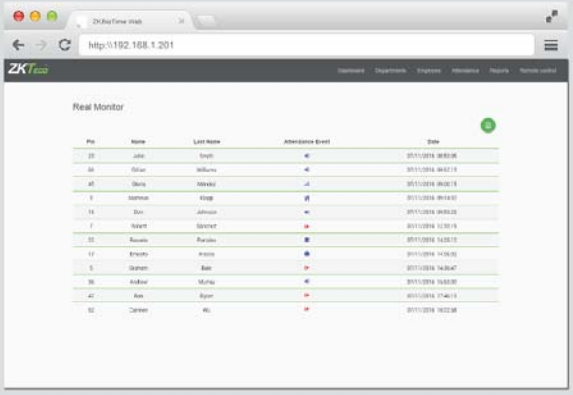
Multi-language Supported

Without software installation

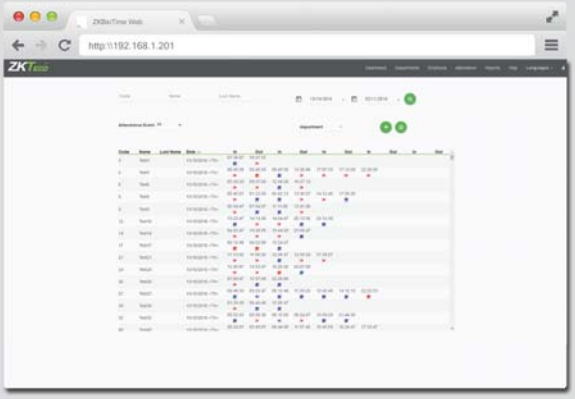
Webserver Features



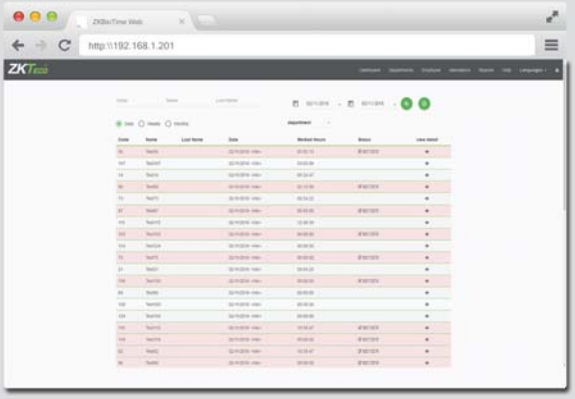
Employee Management
BioTime Web features browser user management, allowing personal data entry as well as department allocation.



Real-Time monitoring
The system provides all log information in real-time so you can check the latest actions of each user.



Attendance Management
With an intuitive interface, the system displays all terminal activity graphically and chronologically, and features date and time filters. All information can be exported to Excel.



Attendance Reports
BioTime Web includes a flexible timetable feature, the reports of which can be exported, organized by day, week or month. This way you can import data in your preferred format to another system.
