

USER MANUAL

VT07-C22L

For TCP/IP with 2WIRE system

April, 2023

■ Remark

Please follow the user manual for correct installation and testing. If there is any doubt please call our tech-supporting and customer center.

Our company applies ourselves to reformation and innovation of our products. No extra notice for any change. The illustration shown here is only for reference. If there is any difference, please take the actual product as the standard.

The product and batteries must be handled separately from household waste. When the product reaches the end of service life and needs to be discarded, please contact the local administrative department and put it in the designated collection points in order to avoid the damage to the environment and human health caused by any disposal. We encourage recycling and reusing the material resources.

Product Features

1. Building intercom application:

Talkback: Support video call, monitoring, unlocking, and checking the call records.

Security: Support 8 alarm zones with 3 states, zone and scene setup.

Smart: Support smart home extension by RS485 communication(Optional).

2. Operating system: Linux

Technical Parameters

Voltage: DC 48V

Rated power: 7W(VT07-C22L/VT07-C23L)

8W(VT10-B21L)

Standby power consumption: 3W

Display screen: 7"/10.1"

Touch screen: Capacitive / Resistive touch screen

Resolution: 7": 800x480

10.1": 1024x600

Operating temperature: -10℃~+55℃

Storage temperature: -10℃~+60℃

Storage Relative humidity: 20%~80%

CPU: quad-core 1.2 GHz

Memory: 64MB

Flash: 128MB

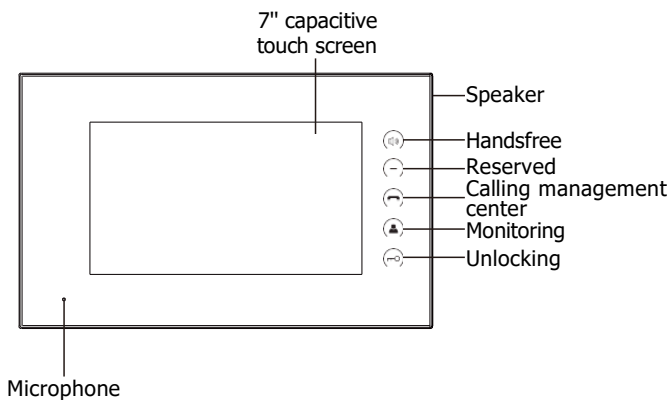

IP grade: IP30

Model:VT07-C22L

- ◇ Indoor monitor doesn't support the connection with external camera, audio extension, WIFI, Bluetooth, external USB and TF storage card.
- ◇ Standard indoor monitor doesn't include RS485 communication function.
Please contact the supplier if you have such requirement.

Operations

Main menu: Dial, Panel, Message, Security, Concierge, Monitor, Setup.

Instructions of status bar and shortcut key:

1. Call logs: Click to check call logs.
2. Phone Book: Click to check and call contacts.
3.  SOS: Click to make a direct emergency call to Master Station.
4.  Lift control: Click to summon the elevator to go up or down. Click Permit inside of it to release the floor button in the elevator.
5.  QR code: Click to scan QR code with Smart Life app to add this Indoor Monitor to your phone.
6.  Mute: Click to mute.
7.  Turn off: Click to turn off the screen.

1.Dial

Click "Dial" icon, the system will enter the following interface:

1.1 Call Resident

Input 1-3 digits building No.+ "Building" + 2-digit Unit No. + "Riser" +4-digit room No., then click  icon to call.

The system will enter into the following interface:

When the call is answered, the system will enter into call state:

1. If there is a camera, the caller's image will be displayed on the screen;
2. When the call is answered, the video will be uploaded into the indoor monitor.

When calling, the indoor monitor will ring; if there is no answer within 25 seconds, the call will be ended.

click  icon to end the call.

1.2 Call Master Station

Click "Concierge" icon to call master station, the system will call master station No.1-No.5 successively. If the master station cannot be searched or call failed, the system will automatically call next master station. When the master station answers, it will ring and stop calling next one.

Click  icon to end the communication.

1.3 Receive Call from Door Station

When the door station, wall door station or secondary door station calls, the indoor monitor will ring; when door station calls indoor monitor, the image from door station will be displayed on the indoor monitor; if there is no answer within 25 seconds, the call will be ended.

click  icon to end the call; click  icon to unlock the door.

Remark: Click  icon to switch between answering interface and monitoring interface of IP camera. After numeric keypad shows, press number key "2" to "9" to select the IP camera and press "1" to return to previous page.

2. Panel

Click "Panel" icon on the main interface, the system will enter the following interface:

The door station can be monitored here. To switch the type of door station, please follow the operations as below:

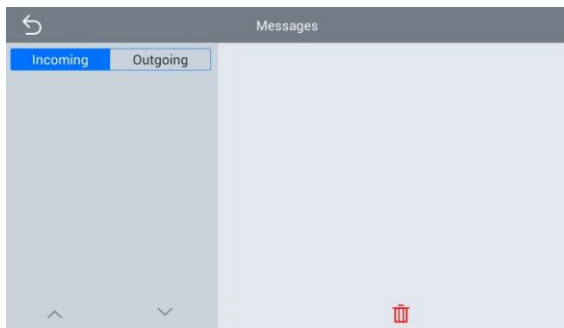

1. Click "✓" icon to select the type of door station ⇒ Click "📹" icon ⇒ Click "👁" to start monitoring;
2. Click "⏸" icon ⇒ Click "✓" icon to select the type of door station ⇒ Click "📹" to start monitoring.

During monitoring, click "🔓" icon to unlock the door.

Remark: The system's default monitoring time is 25s.

3. Message

Click "Message" icon on the main interface, the system will enter the following interface:

Note: Indoor monitor can only receive the message sent by the management software installed on the computer which is usually located at guard center.

Up to 64 records can be received in SMS.

4. **Security**

Click "Security" icon on the main interface, the system will enter the following interface:

4.1 **ON/OFF**

Click "ON/OFF" icon, the system will enter into the following interface:

4.1.1 ON

Click "Out", "Home", or "Sleep" icon to activate the alarm sensors, the icon on the main interface will light up with a beep and stay lit.

4.1.2 OFF

- (1) During delay time of the alarm, click "OFF" icon, the system will beep to disable the alarm.
- (2) Input user password(the default password is 1234) to disable the alarm under alarm ON status.

4.2 Zone

Remark: the settings should be made when alarm is OFF.

Click "Zone" icon and input 1-16 digits password(the default password is 1234), the system will enter into the following interface:

NO.	Type	Mode	Delay	Sensor
1	24 Hour ▼	3C ▼	0s ▼	Smoke ▼
2	24 Hour ▼	3C ▼	0s ▼	Smoke ▼
3	24 Hour ▼	3C ▼	0s ▼	Smoke ▼
4	24 Hour ▼	3C ▼	0s ▼	Smoke ▼

OK

4.2.1 Alarm Type

Click Type, it will show as the following. In this interface, you can set alarm Type as: Normal, Emerg. or 24 Hour. 24 Hour and Emergency types are always active.

NO.	Type	Mode	Delay	Sensor
1	24 Hour ▼	NO ▼	0s ▼	Smoke ▼
2	Normal Emerg. 24 Hour	3C ▼	0s ▼	Smoke ▼
3	24 Hour ▼	3C ▼	0s ▼	Smoke ▼
4	24 Hour ▼	3C ▼	0s ▼	Smoke ▼

OK

4.2.2 Mode

Click Mode, it will show the following interface. In this interface, you can set mode as: 3C, NO, NC or BELL.

The screenshot shows a configuration window titled 'Zone' with a table of four zones. The 'Mode' dropdown for the second zone is open, showing options: 3C, NO, NC, BELL, and 3C. The 'OK' button is at the bottom.

NO.	Type	Mode	Delay	Sensor
1	24 Hour	NO	0s	Smoke
2	24 Hour	3C	0s	Smoke
3	24 Hour	NC	0s	Smoke
4	24 Hour	BELL	0s	Smoke

4.2.3 Delay Time

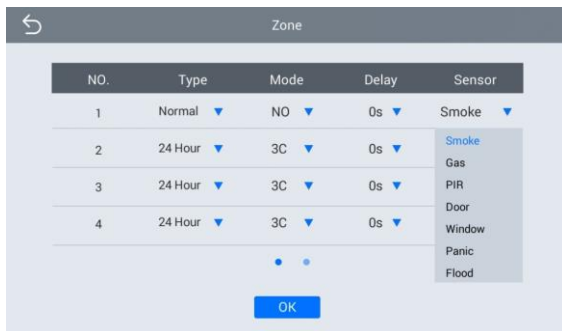

It refers to the delay time of giving an alarm. Click Delay setting, it will show the following interface with selections: 0s, 5s, 15s, 20s, 25s, 40s or 60s as the desired delay time. For example, select the delay time: 5s. Once the alarm sensor is triggered, the indoor monitor will issue the sirens after 5 seconds.

The screenshot shows the same 'Zone' configuration window, but the 'Delay' dropdown for the second zone is open, showing options: 0s, 5s, 15s, 20s, 25s, 40s, and 60s. The 'OK' button is at the bottom.

NO.	Type	Mode	Delay	Sensor
1	Normal	NO	0s	Smoke
2	24 Hour	3C	0s	Smoke
3	24 Hour	3C	15s	Smoke
4	24 Hour	3C	3C	Smoke

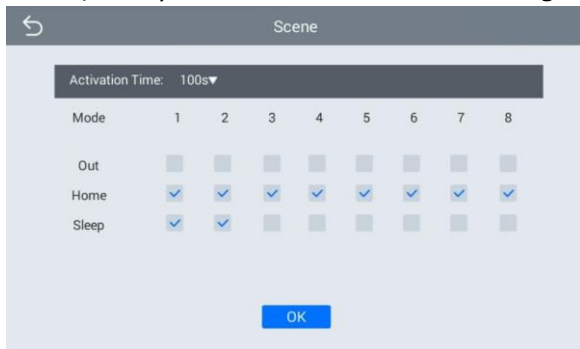

4.2.4 Sensor Type

Click sensor type, it will show the following interface. Each sensor type can be set up as: Smoke, Gas, PIR, Door, Window, Panic, Flood.

4.3 Scene

Click "Scene" icon, the system will enter into the following interface:

☒ refers to Alarm ON, ☐ refers to Alarm OFF. To set the sensor of alarm stations, you can click the corresponding station with ☒ icon. Click "Activation Time" to select the corresponding time. The options of activation time include NONE, 30s, 40s, 60s, 100s and 300s.

4.4 Setup

Click "Setup" icon, the system will enter into the following interface:

The screenshot shows a 'Setup' screen with a 'Password' tab highlighted in blue. Below the tab are three text input fields labeled 'Old', 'New', and 'Confirm'. An 'OK' button is located at the bottom right of the screen.

You can set the new system password with 1-16 digits (the default password is 123456). System password is used for system settings.

5. Concierge

Click "Concierge" icon on the main interface, the system will enter the following interface:

The screenshot shows a 'Dial' screen. On the left is a 'Phonebook' section. The main area contains a numeric keypad with buttons for digits 1 through 9, 0, and a green call icon. To the right of the keypad are three buttons labeled 'Building', 'Riser', and 'Concierge'. At the top, a status bar indicates 'Concierge1 In calling.'.

Click "Concierge" icon to call master station, the system will call master station No.1-No.5 successively. If the master station cannot be searched or call failed, the system will automatically call next master station. When the master station answers, it will ring and stop calling next one.

Click  icon to end the communication.

6. Monitor

Click “Monitor” icon on the main interface, the system will enter the following interface:

The IP camera can be monitored here. To switch the type of IP camera, please follow the operations as below:

1. Click  icon to select the camera → Click  icon ⇒ Click “” to start monitoring;
2. Click  icon ⇒ Click “” icon to select the camera → Click “” to start monitoring.

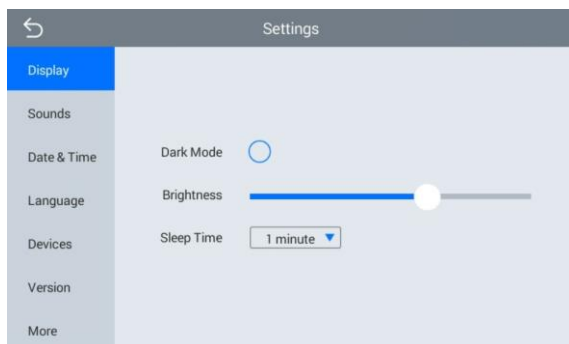

Remark: The system’s default monitoring time is 25s.

7. Setup

Click “Setup” icon on the main interface to make the following settings.

7.1 Display

“Dark Mode”, “Brightness” and “Sleep Time” can be set.

7.2 Sounds

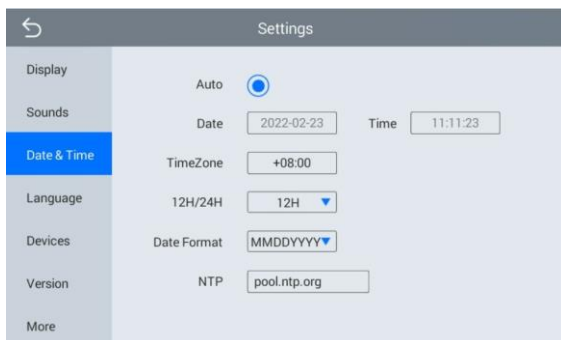

Click "Sounds" icon, the system will enter into the following interface:

"Auto Answer", "Ring Vol", "Intercom Vol" and "Ringtone" can be set.

7.3 Date & Time

Click "Date & Time" icon, the system will enter into the following interface:

This interface can set "Auto", "Date", "Time Zone", "12H/24H", "Date Format" and "NTP".

7.4 Language

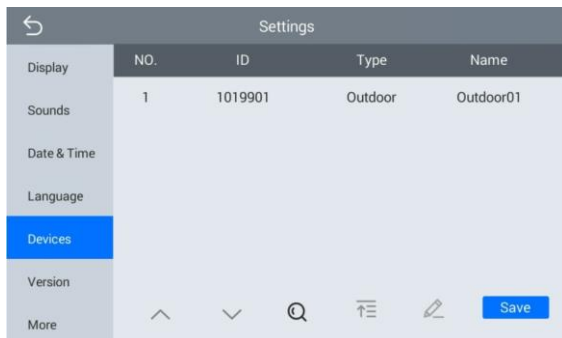

Click "Language" icon, the system will enter into the following interface:

The system language can be switched.

7.5 Devices

Click “Devices” icon, the system will enter into the following interface:

The device information can be viewed.

7.6 Version

Click “Version” icon, the system will enter into the following interface:

Version information including "FW", "UI", "LAN IP", "WiFi IP" and "MAC" can be viewed.

7.7 More

Click "More" icon, then input 1-16 digits password (the default password is 123456) to make the following settings:

7.7.1 Network

Click "Network" icon, the system will enter into the following interface:

After using the DHCP, the router will automatically distribute IP address. Other settings are the same as the ones of Smart Life APP.

IP: Static IP address.

Mask: The default Mask address is 255.255.255.0. Normally, it can keep unchanged. To modify it, click the setting box twice, a keypad will pop up for entering new Mask address.

Gateway: The Gateway in one system must be in the same segment.

DNS: It refers to name resolution address (DNS of local operator). If the indoor monitor is used in external network, the address must be completed correctly; if it is used in internal network, the address can be ignored.

7.7.2 Room

Click "Room" icon, the system will enter into the following interface:

Advanced Settings		
Network	Building	<input type="text" value="1"/>
Room	Riser	<input type="text" value="1"/>
Password	Apartment No.	<input type="text" value="1111"/>
Reset	Device	<input type="text" value="0"/>
	Sync	<input type="text" value="971764"/>
	CMS IP	<input type="text" value="192.168.68.1"/>
		<input type="button" value="OK"/>

Warning: Please revise Sync No.(6 digits) as soon as possible after you read the user manual. The Sync No. of all indoor monitors in one household must be the same.

Input the 3-digit Building No. such as 001, and then click "OK" to finish the building No. setting.

The setting method of Riser No., Apartment No., Device No., CMS IP and Sync No. is the same as the one of Building No.. When Device No. is set to be 0, the indoor monitor is regarded as the main; when Device No. is set from 1 to 5, the monitor is regarded as the sub1 to sub5.

7.7.3 Password

Click “Password” icon, the system will enter into the following interface:

The screenshot shows the 'Advanced Settings' window with a sidebar on the left containing 'Network', 'Room', 'Password', and 'Reset'. The 'Password' option is selected and highlighted in blue. The main area contains three input fields: 'Old' (with a back arrow icon), 'New', and 'Confirm'. An 'OK' button is located in the bottom right corner.

You can set the new system password with 1-16 digits (the default password is 123456). System password is used for system settings.

7.7.4 Reset

Click “Reset” icon, the system will enter into the following interface:

The screenshot shows the 'Advanced Settings' window with a sidebar on the left containing 'Network', 'Room', 'Password', and 'Reset'. The 'Reset' option is selected and highlighted in blue. The main area displays the text 'Reset to factory default?' followed by a radio button. An 'OK' button is located in the bottom right corner.

To confirm the operation, click OK.

WEB SETTING

Connect the indoor monitor and computer by network switch. Input the indoor monitor's IP address in the browser, then input user name and password (the default user name is "admin", the password is "123456") to enter into the web setting interface.

Main page is used for showing firmware version and the status of SIP registration.

1. Network

Network page is used for setting up network of device here. DHCP: obtain IP address via DHCP;

IP: static IP

address; Mask:

subnet mask;

Gateway: gateway;

DNS: Domain Name Server;

Eth & WiFi: switch to activate network port and WiFi of the device to work simultaneously.

2. RoomNo

The screenshot shows the 'Room No. Settings' page. On the left is a green sidebar with a menu: Main, Network, RoomNo, VOIP, Advanced, Monitor, Others, License, and Logout. The main content area has a title 'Room No. Settings' and several input fields: Build (1), Unit (1), Room (1111), Device (0), Sync (127827), Server (192.168.12.40), and Password (123456). A 'Submit' button is at the bottom.

RoomNo page is used for setting up connection with other devices. Build: number of the building;

Unit: number of the unit;

Room: number of the room;

Device: the numbering system for same-room number devices (Indoor Monitor 0-9; Outdoor Station 1-9);

Sync: type in same numbers to make same-room number Indoor Monitors ring together;

Server & Password: server is the IP of CMS and password is the admin's password of device.

3. VOIP

The screenshot shows the 'SIP Settings' page. On the left is a green sidebar with a menu: Main, Network, RoomNo, VOIP, Advanced, Monitor, Others, License, and Logout. The main content area has a title 'SIP Settings' and several settings: 'SIP enable' with a checkbox, 'Proxy' (sip:192.168.12.40), 'Realm' (192.168.12.40), 'Outbound' (sip:), 'User' (100), 'Password' (*****), 'Timeout' (300s), 'Voice' (224.0.0.1:50001), and 'Multicast'. A 'Submit' button is at the bottom.

VOIP page is used for setting up SIP.

SIP enable: switch to enable or disable SIP;

Proxy: fill server address and port, the format: sip:server address:port; Realm: fill server address and port, the format: server address:port; Outbound: if you don't have

outbound server, leave it blank;

User & Password: account and password of SIP;

Timeout: maximum call duration;

Voice Multicast: fill voice gateway to receive voice broadcast.

4. Advanced

Streaming Media Solution

Advanced Settings

Ex Phone:

Auto Pickup: ☐

System Diagram

1. Power

Power input interface (nonpolar): input power over 2-wire cable.

2. RS485

Connect with smart home and alarm external module, etc.

Offer a group of 12V/100mA power by RS485.

3. Siren

When alarm sensor is triggered, 12V/100mA power is output.

4.Alarm interface(S0/S3/S6/S8/S9)

Each interface of 8 alarm zone with 3 states can be connected with normally-open or normally-closed switch.

Offer a group of 12V/100mA power by alarm interface.

Installation

Model: VT10-B21L

Size: 270*168*15mm

Model: VT07-C23L

Size: 235*145*19.5mm

Model: VT07-C22L

Size: 221.4*151.4*16.5mm

Installation Instructions:

[Suggestion]: During the installation, the camera should be 1450 ~ 1550mm above the ground. The camera tether for photographing human face should be the top priorit

Troubleshooting

The indoor monitor cannot start up or power off automatically.

- Check whether it has power-failure, and power it on again.
-

The indoor monitor display screen is too dim.

- Check whether the brightness and contrast settings of screen are correct.
-

No sound during the communication.

- Check whether the indoor monitor is set as mute mode, or the volume is adjusted at the minimum.
-

The indoor monitor cannot monitor the outdoor panel.

- Other user is using the system, so you can use it once he/she finished the operation.
-

Multimedia files cannot be played normally.

- Check whether the system supports the file format. Please refer to multimedia setting for details.
-

No response when clicking indoor monitor display screen.

- Press "Unlock" button for 5s, or slowly slide horizontally or vertically on the LCD to make touchscreen calibration. It needs to be calibrated twice.
-

Touchscreen responses slowly or cannot make calibration.

- Take down any protective paster, since it may affect identification and input for device;
 - Ensure the finger is dry and clean when clicking touchscreen;
 - Restart the device to clear any temporary software error.
-

The temperature of device is too high.

- Long-term use leads to high temperature. It's normal and will not affect the device's use life and performance.

Safety Instructions

In order to protect you and others from harm or your device from damage, please read the following information before using the device.

Do not install the device in the following places:

- Do not install the device in high-temperature and moist environment or the area close to magnetic field, such as the electric generator, transformer or magnet.
- Do not place the device near the heating products such as electric heater or the fluid container.
- Do not place the device in the sunshine or near the heat source. This might cause discoloration or deformation of the device.
- Do not install the device in an unstable position to avoid the property losses or personal injury caused by the falling of device.

Guard against electric shock, fire and explosion

- Do not use damaged power cord, plug or loose outlet.
- Do not touch the power cord with wet hands or unplug the power cord by pulling.
- Do not bend or damage the power cord.
- Do not touch the device with wet hands.
- Do not make the power supply slip or cause the impact.
- Do not use the power supply without the manufacturer's approval.
- Do not have the liquids such as water go into the device.

Clean Device Surface

- Clean the device surfaces with soft cloth dipped in some water, and then rub the surface with dry cloth.

Other Tips

- In order to prevent damage to the paint layer or the case, please do not expose the device to chemical products, such as the diluent, gasoline, alcohol, insect-resist agents, opacifying agent and insecticide.
- Do not knock on the device with hard objects.
- Do not press the screen surface. Overexertion might cause flopover or damage to the device.
- Please be careful when standing up from under the device.
- Do not disassemble, repair or modify the device at your own discretion. The arbitrary modification is not covered under warranty. When any repair required, please contact the customer service center.
- If there is abnormal sound, smell or fume in the device, please unplug the power cord immediately and contact the customer service center.
- When the device isn't used for a long time, the adaptor and memory card can be removed and placed in dry environment.
- When moving, please hand over the manual to new tenant for proper usage of the device.
