

The ZKTeco logo is positioned in the upper right corner of the page. It consists of the letters 'ZKTeco' in a bold, sans-serif font. The 'ZKT' part is in a dark grey color, while the 'eco' part is in a lighter grey color. The logo is set against a solid green rectangular background.

ZKTeco

The background of the entire page is a black and white photograph of a modern glass skyscraper. The building's facade is composed of many rectangular glass panels, some of which are reflecting the sky and other buildings. The perspective is from a low angle, looking up at the building, which creates a sense of height and scale. The lighting is dramatic, with strong highlights and deep shadows.

ZKTeco Europe

Your Global Leading Provider of Biometrics and Contactless Solutions

ZKTeco is an internationally renowned enterprise which specializes in advanced biometric verification technologies and security solutions bringing to the market products focusing on: Smart Identity Authentication Applications, Smart Entrance Control Solutions, including pedestrian and vehicular, Smart Office, and Smart Access solutions to automate all your attendance processes and to strengthen building security and surveillance. ZKTeco offers services on all fronts: public-service, enterprise-level and personal users.

As a global company, ZKTeco is present in more than 40 countries and territories in Europe, USA, Brazil, Middle East, Indonesia, Mexico, Thailand, India, South Africa, Argentina, among others. With over 3,800 employees globally and over 1,100 R&D engineers, ZKTeco has manufacturing plants in Dongguan and three companies specializing in biometric verification, business operations, and processor test laboratories in the USA. Additionally, ZKTeco has R&D centres for innovation and design located in Europe, India and China. Our global presence and team of dedicated experts further enhances our ability to provide local products, local logistics, local support, and local services to our customers and partners worldwide.

ZKTeco Europe has its headquarters in Madrid, Spain, focusing on proximity, quality, value, marketing, sales, logistics, customer services, RMA, and product warranties for the entire ZKTeco product range throughout the EU territory. From our headquarters, we manage logistics & warehouse operations with a capacity of over 3.000m2 to optimize product distribution and RMA services. Additionally, Madrid is home to our EU R&D Center, an essential service to design and develop products and solutions specifically adapted to our European customers.

ZKTeco Europe has wholly-owned subsidiaries in the United Kingdom and Spain, and local presence in Italy, Germany, Romania, Poland, and Portugal.

Why ZKTeco?

ZKTeco is one of the largest global manufacturers and distributors of biometric & RFID security solutions. We've sold over 40 million units supported by 50 global offices.

We build all of our products in-house at our state-of-the-art, 1 million square foot, ISO 9001 certified factories operating in numerous countries. We control everything-including R&D, manufacturing, product design, terminal assembly, and logistics/shipping.

Our huge economies of scale allow us to pass on significant cost-savings on to our customers. We're flexible, reputable, easy to work with, and we have offices all around the globe ready to serve you.

Access Control

State-of-the-art 1, 2 and 4-door access control panels with a built-in Web application to eliminate the need for management software.

Atlas Series Access Control Kits

- Available in 1, 2 and 4-door kits.
- Easy to install and program.
- No software needed. Panels include embedded access control web application.
- Web application supports up to 21 panels (max 84 doors).
- Kits include 12V DC power supply. Panels have embedded PoE.
- Supports TCP/IP, RS485, and Wi-Fi communication.
- Free ZKey App available for iOS and Android platforms, which supports admin functions and mobile credentials.
- Extremely secure. OSDP-Verified.

Atlas Demo Kits

Unlock the full potential of Atlas Series with a variety of Access Control Kits. These kits provide you with the tools to test a complete system with cutting-edge access controllers, external readers, and essential accessories. Elevate your demonstration game and captivate your customers by showcasing the solution in its finest light. It's not just testing; it's an immersive experience in security excellence!

Compatible Readers

Biometric Readers

Outdoor-rated fingerprint and ZKTeco (or HID) prox card readers.

QR Code Readers

Outdoor-rated QR code, ZKTeco prox, and keypad readers.

Proximity Readers

Outdoor-rated mullion and single-gang size readers support ZKTeco (and HID) prox cards and PINs.

ZKey Mobile App

for Administrators and Users

Free Mobile-App to manage user QR & BT credentials

Compatible with ZKTeco's QR Code Readers

Dynamic & Encrypted re-generating QR Code

Advanced Access Control Features

Built-in Web Application provides advanced access control features including: user enrollment, management, reporting, maps, card design, duress PINs, and many more.

Door Control & More

User-programmable auxiliary relays can be used for door control & monitoring, lockdown, anti-passback, first-card opening, multi-card opening, lights, alarms, annunciators, intrusion detection panels, additional locking devices, or any other electrical device that can be controlled by a switch.

Capacity

1 primary Atlas panel can connect and manage up to 20 secondary panels. Maximum 84 doors can be supported when using all 21 panels. Each Atlas panel can store up to 5,000 users and 10,000 transactions.

Choice of Readers

Atlas panels support any reader that communicates via Wiegand or OSDP communication protocols including ZKTeco's KR/FR Series and mobile device readers (i.e. Bluetooth and QR code)

Communication

Atlas Series panels communicate securely over wired & wireless networks for lighter security networks using SSL/TLS. Supported browsers include Google Chrome, Mozilla Firefox, Safari and Microsoft Edge.

Mobile App

Numerous convenient features include: remotely unlocking doors, universal lockdown & recovery, access to events & alarms, adding/modifying users, and much more.

Power

Atlas Panels operate on 12V DC and draws 1A power and can also be powered by Power over Ethernet (PoE)

Lowest Total Cost of Ownership

Atlas Series panels come in several models to suit different project needs and reduce the cost of unused capacity. Its easy-to-use embedded web application gets you up and running quickly. Firmware is field upgradeable, allowing your system to stay current with the latest features and security enhancements.

RFID & Multi-Biometric Access Control Terminals

with RFID, Face & Palm Recognition

ZKTeco's RFID and multi-biometric embedded face & palm recognition sensor provides 100% touchless user authentication for various applications including Access Control, Visitor Management, Event Management and more. Thanks to Visible Light Technology users no longer need to stand steadily in front of camera as they are automatically recognized when passing through a specified area.

-  Touchless Facial & Palm Recognition biometric security
-  Capacity to store & match up to 50,000 face and 5,000 palm templates
-  I/O ports to control door lock & REX. Wiegand and OSDP output
-  Centralized Management with ZKBio CVSecurity All-in-One Security Platform
-  Seamless Integration with 3rd party PAC systems via BioPack software

Installation Accessories

ProMA

ProMA is an outdoor biometric access control device, a new generation of high-end outdoor multi-biometric access control standalone terminals built with ultra-robust aluminium alloy casing. Manage and monitor building access control with ZKTeco's door video entry system incorporating biometric state-of-the-art technology.

SC800

SC800 is a waterproof RFID Access Control terminal that is designed for outdoor applications. It adopts a metal midframe housing and a 2.5D tempered glass panel, supporting IP65 waterproof and IK04 vandal-proof. SC800 offers a Multi-tech RFID module that supports dual frequency 125kHz and 13.56MHz cards.

BioOnCard

BioOnCard technology delivers a double verification process of advanced palm/face recognition algorithms with computer vision, and RFID technologies to improve security performance and meet a broad range of mainstream access control applications. The solution allows recognition in less than 1 second after transferring the template from the card and can easily be integrated with most of ZKTeco's advanced biometric terminals. BioOnCard is based in **ProFace X** and **SpeedFace-V5L** Series.

C3 Pro-Series IP-Based Access Control Panels RFID

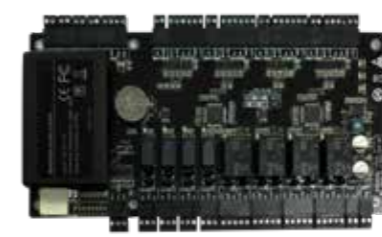

- Available in 2 and 4-door panels and bundles.
- Supports up to 8,000 doors.
- Advanced access control features include; Global AntiPassback, First and Multi Card Opening, Duress Password/ Card Entry, E-map Support, Real-Time Push Protocol & more.
- Compatible with ZKBio CVSecurity Software, only.
- Supports Multiple Wiegand readers.
- 30,000 Card Holder Capacity.
- 20,000 fingerprint template capacity.
- 100,000 Events Log Capacity.
- 12V DC 1.5A Power Supply recommended.
- TCP/IP Communication.

C3-200-PRO 2-Door Panel

- 4 Wiegand Readers
- 6 Inputs (2 for Exit buttons, 2 for Door Status, 2 for Aux)
- 4 Outputs (2 form C Relay for lock and 2 form C Relay for Aux Output)

C3-400-PRO 4-Door Panel

- 4 Wiegand Readers
- 12 Inputs (4 for Exit buttons, 4 for Door Status, 4 for Aux)
- 6 Outputs (4 form C Relay for lock and 2 form C Relay for Aux Output)

Elevator Control Secure, Scalable & Versatile

EC16 Elevator Control Panel

DEX16 Expansion Board

Floor access can be restricted based on various user credentials including biometric, proximity card and/or password. Pre-defined time schedules can also be used to control floor access. During normal business hours, unrestricted floor access can also be permitted (aka passage mode). The EC16 Elevator Control Panel can restrict access up to 16 floors. The DEX16 Expansion Boards can restrict access up to an additional 16 floors. Each EC16 Panel can support up to seven DEX16 Expansion Boards. When combined, a total of 128 floors can be controlled with a single EC16 and DEX16 bundle.

Compatible Readers

Wiegand Readers

Outdoor-rated prox card readers with keypad version.

QR Code Readers

Outdoor-rated QR code, ZKTeco prox, and keypad readers.

RS485 Readers

Elegant Outdoor-rated prox card readers with keypad version.

PRO SERIES

inBio Pro Series IP-Based Access Control Panels Fingerprint

inBio Pro Series is a next-generation series of fingerprint & card-matching panels having advanced access control features including anti-passback, first-card opening, multi-card opening, duress password entry, embedded card verification and real-time Push protocol.

- Available in 2 and 4 door panels and bundles
- Compatible with ZKBio CVSecurity Software only
- Compatible with Wiegand and OSDP readers, FR-1500, RS-485 fingerprint Reader and others upon request
- Stores 20,000 fingerprints / 60,000 Cardholders
- 100,000 log events capacity
- 12V DC 1.5A Power Supply Recommended

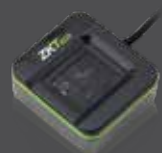

InBio 260-Pro 2-Door Panel

InBio 460-PRO 4-Door Panel

Compatible Readers

USB Fingerprint Reader SLK-20R

High resolution Fingerprint Reader with USB connectivity for enrollment of fingers.

Face

KF1000 Series

Equipped with ZKTeco visible light facial recognition, it is fully compatible with inBio Series controller panels.

Fingerprint

FR1500S

Single-gang flush-mounted fingerprint (and prox card) reader used for door access. Supports inBio Pro panels, only.

Features & Benefits

Choice of Readers

For fingerprint-matching, select only ZKTeco FR-Series fingerprint readers. Full range of prox and other card readers also supported. ZKTeco KR-Series card readers are stylish and waterproof. InBio Pro supports any Wiegand reader, including 125kHz/13:56MHz, bluetooth and QR code credentials.

Communication

InBio Pro panels communicate over TCP/IP and also support encrypted communication between the panels and ZKBio CVSecurity software.

Lowest Total Cost of Ownership

InBio Pro panel firmware can be upgraded in the field. New controller features can be loaded without any advanced tools, extending and expanding the value of your investment.

Built-in Advanced Access Control

Anti-Passback, First-Card Opening, Multi-Card Opening, Duress Password Entry and Auxiliary Input/Output Linkages are just some of the many features.

Door Control & More

Along with relay contacts for controlling door locks, easily programmable auxiliary relays can be used for additional control and interface to lights, alarms, annunciators, intrusion detection panels, or even extra locking devices or gate controllers.

Capacity

20,000 fingerprints and 60,000 card holders. The panel is backed up in real-time in optional on-board SD card. Data is preserved if power is lost. The panel continues to operate even if network connection is interrupted.

For Software Developers

SDK is available for software developers who wish to integrate the InBio Pro panels with their existing security or personnel management applications. Upon request, ZKTeco can also customize InBio Pro firmware to meet any specific requirements.

Software Solutions

ZKTeco Europe provides on-site & cloud-based software solutions that work seamlessly together

ZKBio CVSecurity

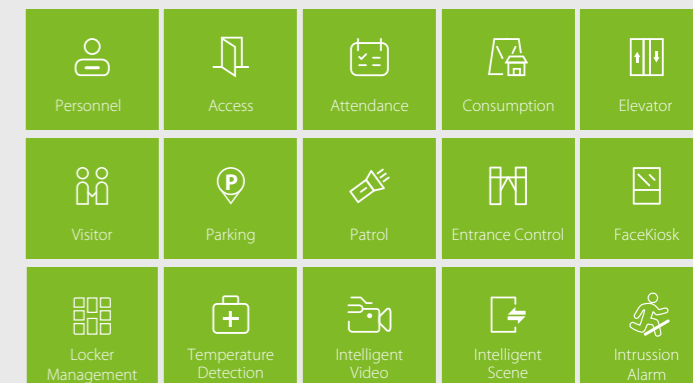

All-in-One
web-based
security platform

Features & Benefits

Software Modules

Entrance Control

Sleek Modern Reliable

Entrance Control Solutions

Full range of turnstiles integrated with access control and visitor management using traditional card access mobile device (Bluetooth or QR codes), or biometric readers.

Tripod Turnstiles

ZKTeco waist-high tripod turnstiles are most often installed in public venues where tailgating is a concern (i.e. subways, theatres, etc.). The turnstiles have a rotating 3-arm barrier which restricts passage. Users must first authenticate themselves before pushing forward on the upper-most turnstile arm to gain passage.

mTS1000

Single lane tripod turnstile with single-cabinet design

TS2000 PRO

Single lane tripod turnstile with single-cabinet design

TS1000 PRO

Single lane tripod turnstile with single-cabinet design

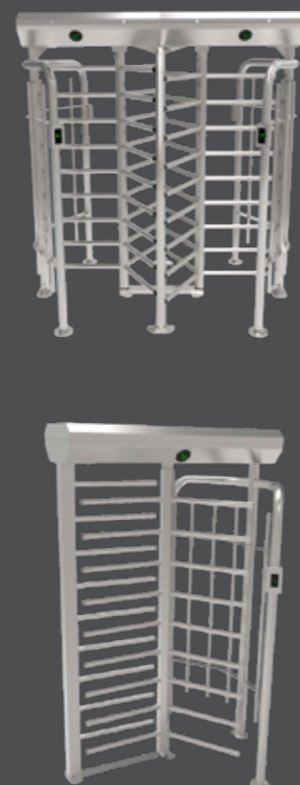

Note that all ZKTeco tripod turnstiles can be pre-ordered with integrated access control readers (RFID, Fingerprint, Face, Finger-vein, Palm-vein, etc.)

Full-Height Turnstiles

ZKTeco full-height turnstiles provide the highest level of security.

Combine with access control and biometrics for a complete security system. They are most often used to restrict access to high-security facilities, including government buildings or large public venues including amusement parks and indoor/outdoor arenas.

Easy to install and maintain and are waterproof.

FHT2300D

Dual-lane full-height turnstile.

FHT2300

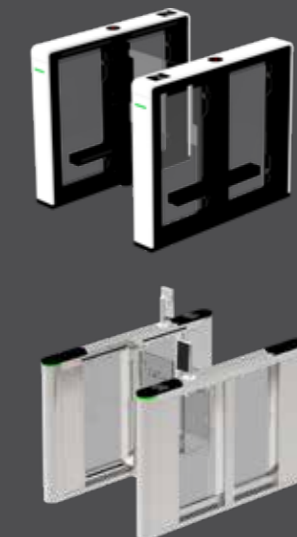

Single-lane full-height turnstile

Note that all ZKTeco full-height tripod turnstiles can be pre-ordered with integrated access control readers (RFID, Fingerprint, Face, Finger-vein, Palm-vein, etc.)

Swing Barrier Turnstiles

ZKTeco swing barrier turnstiles are most often used to restrict access to the lobbies of commercial office buildings.

ZKTeco swing barrier turnstiles are approximately 3-feet tall and have a tempered glass or acrylic gate which restricts passage. Swing barrier turnstiles provide unencumbered passage, which is especially convenient when carrying bags or using a wheelchair.

SBTL7000

Single-lane swing barrier turnstile with dual-cabinet design

SBTL8000

Dual-lane swing barrier turnstile with single-cabinet design

Note that all ZKTeco swing barrier turnstile lanes accommodate wheelchair users (ADA). The lane can be widened by ordering a wider gate. Turnstiles can be pre-ordered with integrated access control readers (RFID, Fingerprint, Face, Finger-vein, Palm-vein, etc.)

Mars Pro Series Turnstiles

The Mars Pro Series includes models with swing and flap barrier movement and is designed to enable secure contactless access and pleasant passage in areas with high-traffic volume, reducing bottlenecks at the entrance and exit of buildings.

All businesses, small or large, require solutions that balance design and security. Mars is an ideal entrance control solution thanks to its modular structure, interchangeable reader options (RFID, fingerprint recognition, QR Code, Card), and durable build. An excellent fit for most interior design styles and requirements guaranteeing to provide a seamless user experience.

Mars Pro-S1000

Single-lane speed gate with single-cabinet design

Single Pass monitoring in both Directions

Anti-Tailgating

Emergency unlock

Anti-Collision

Anti-Pinch

Wheelchair Accessible

Note that all ZKTeco swing barrier turnstile lanes accommodate wheelchair users (ADA). The lane can be widened by ordering a wider gate. Turnstiles can be pre-ordered with integrated access control readers (RFID, Fingerprint, Face, Finger-vein, Palm-vein, etc.)

Walk-Through Metal Detection

Stop concealed metal objects
BEFORE they enter your facility.

ZKTeco Walk-Through Metal Detectors help secure
your facility

- ZK-D100S / ZK-D300**
Hand Held Metal Detector
- It can be recharged in 4-6 hours
 - Alarm: Sound and light simultaneously, or vibration and light simultaneously
 - Battery saving function
 - CE, FCC Certified
 - High-tech like appearance and strong anti-interference ability. (ZK-D300)

- FMD Pro 2.0**
Portable Ferromagnetic Mobile
Phone and Metal Detection System
- High scanning rate, 50 people can be screened per minute.
 - Excellent anti-interference ability.
 - Up to 100 sensitivity levels.
 - Three zones targeting indication identities location of contraband on the body.
 - Mobile with wheels base.
 - WiFi communication for 3rd party remote monitoring.
 - Relay for access control and alarm activation.
 - Detection radius up to 1 meters.
 - Magnetic object detection including mobile phones.
 - Ingress protection of IPX5, suitable for most outdoor enclosures.
 - 28-hour continuous operation with embedded battery.

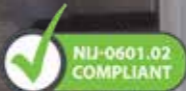

X-Ray Baggage Scanners

Metal Detectors and X-Ray Baggage Scanners
complement each other in high-security
environments.

ZK-D4330
Walk-Through Metal Detector

- 33 detection zones
- 7"LCD HD display interface
- Remote control
- Simple installation and use
- Excellent anti-interference ability and stability
- Each zone has 300 adjustable sensitivity levels
- Supports various language interface customization
- Higher accuracy and verification speed
- CE, FCC NIJ-0601.02 Certified

ZKX5030A
Single Energy X-Ray Baggage Inspection System

Pseudo-color scanning image
Widely used for small parcels
Excellent, ergonomic & industrial design

Standard:
Energy Saving Mode when not in use

Optional:
Bi-directional Conveyor belt
Console Desk

BLADE6040
Screener Assist, X-Ray Baggage Inspection System

Real-time detection & remote monitoring system

Standard:
Typical steel penetration up to 40mm
Startup with fingerprint
Input & Output rollers
Threat Image Projection (TIP)

Optional:
Operator Desk
Eyes-on function (tracking technology to follow operator's eyes as they operate X-Ray inspections)

An aerial, top-down view of a parking lot. Several cars are parked in yellow-lined spaces. The cars include a red sedan, a dark blue sedan, a silver sedan, a dark blue SUV, and a red SUV. The image is dimmed and serves as a background for the text.

Parking Management

Car Parking Management

ZKTeco SPB Pro Parking is a powerful all-in-one integrated solution based on a high-performance parking barrier, a vehicle detection radar, and a license plate recognition camera with embedded software, to fulfill all the requirements of advanced vehicle access control for parking installation projects.

SPB Pro Parking

The system identifies plates from more than 80 countries and supports 3rd party integration (Milestone and Lenel)

BG1000

Barrier Gate with high-efficiency Brushless DC motor

SPB Pro Parking All-in-one integrated solution

BG1000

ZKTeco BG1000 boom barrier has superior reliability with 3 million MCBF of cycles which provide flexibility when installing third-party items such as traffic lights or keypads.

ZK-LPR CarID License Plate Recognition Camera

- **Save installation time:** Avoid extra wiring and foundations for induction loops.
 - **Cost-effective:** All-in-one integrated parking solution from a unique provider.
 - **Scalable solution:** Connect new devices to your system with a quick set-up configuration.
 - **Ready to assemble:** No drilling or additional fixing is required between devices.
 - **License-free:** No additional software required.
 - **Comprehensive solution:** Identification of license plates from over +80 countries around the world.
 - **Versatile:** From heavy-duty applications to outdoor installations.
 - **Secure:** High-accuracy devices to control and prevent vehicles and people from running into obstacles.
- Supports vehicle and people detection.
 - High accuracy OCR.
 - Adjustable detection distance from 1m – 6m.
 - Resistant to adverse weather conditions.
 - Duplicate license plate filtering.
 - LPR system for moving vehicles (up to 20 km/h) or stopped (Stop & Go).

Long range Readers

UHF Reader

Frequency:
E: 865MHz - 868MHz
F: 902MHz - 928MHz
Reading distance:
Up to 18 m (adjustable)

Fixed column

Time Attendance

Your Cloud-based time & attendance solution

GoTime Cloud

GoTime Cloud is a cloud-based Time Attendance Management Solution, that centralizes your employee's real-time information and Time Attendance fingerprint and RFID devices on a single platform, making this data accessible from web browsers, no matter where you are.

With GoTime Cloud your company and employee's data are secure at AWS through your web browser of choice and without requiring any previous infrastructure or software application. Our solution adapts to any change in your company, allowing you to plan and configure without limitations, everything related to the way you track time and attendance. You can create advanced calendars, tailored schedules or configure all shifts for your company.

GoTime Cloud is one centralized cloud-computing environment that ensures that all your existing facilities anywhere in the world work in the same way, letting your employee's remote clock in/out and tracking the exact time and GPS locations.

Complies with Time and Attendance tracking laws

Assign rotating shifts, day shifts, night shifts, keeping all your operating hours covered

Time Attendance Management from anywhere in the world

Remote clock in/out tracking with the exact time and GPS locations

Flexible calendars and schedules

Ideal for small, medium and large companies. Generate reports.

ZPad Plus

Data Collection terminal with Android OS

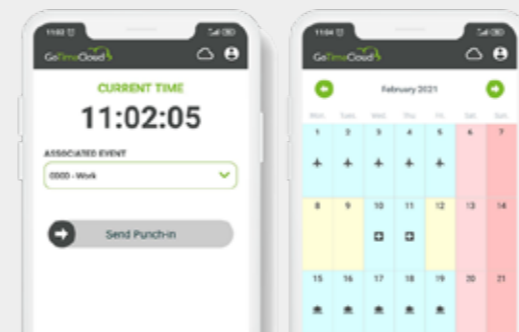

- 7-inch Multi-Touch LCD Screen
- Multiple Events Management
- Multiple verification options (Fingerprint, RFID, QR, password)
- Equipped with Backup Battery
- Wireless communication

Easily view and manage your employees' punches or requests

Record real-time attendance data from various sources, control punches or view employees' time allowed for a specific request. Your employees will be able to interact with GoTime Cloud and visualize their data, being able to request changes and submit them for approval.

Accurately define and calculate hourly totals, control accrued balance hours and keep your company in compliance with labour laws.

Mobile APP & API
Easy Time tracking Solution

Compatible Terminals

Proximity Terminals

Cost-effective prox card terminals compatible with 125kHz and 13.56MHz

Fingerprint Terminals

Biometric solutions compatible with optional double verification FP+RFID

Multi-Biometric Terminals

Advanced Multi-Biometric Solutions for enhanced security and reliability

ZKBio Time Powerful Web-based Time and Attendance Management Software

ZKBio Time is a powerful web-based time and attendance management software that provides a stable connection to ZKTeco's standalone push communication devices and working as a private cloud to offer employee self-service by mobile application and web browser.
