

GoViewCloud

Your **Cloud-based** Video Surveillance Solution

GoViewCloud

GoViewCloud is an intelligent, cloud-based video surveillance solution that allows you to manage IP cameras via PC, tablet or mobile phone with an Internet connection from anywhere in the world.

The solution incorporates, in the cloud environment, storage and monitoring tools to facilitate the management of your video surveillance equipment, with almost zero maintenance, as it is not necessary to depend on intermediate equipment.

Thanks to its simple architecture, GoViewCloud is able to connect an unlimited number of IP cameras to your security system with QR code technology. Automatically scan, link and add your video surveillance cameras to your GoViewCloud platform and turn your video surveillance system into a complete enterprise security platform.

With GoViewCloud, your company and employee data is secure in Azure, using the web browser of your choice and without requiring any prior infrastructure or software installation. Our solution adapts to any changes in your company, allowing you to plan and grow your video surveillance system without limitations. In addition, you can schedule recordings or even receive notifications on any device.

Generate recurring revenue with GoViewCloud

No need to invest in hardware

Easily add cameras to the cloud via QR code

Always keep your installation up to date

Why choose ZKTeco as a technology partner?

ZKTeco is one of the leading manufacturers in the security sector, supplying access control solutions, entry systems, video surveillance, time and attendance terminals and biometric identification devices (facial recognition, fingerprint, palm print) and RFID to its customers for more than 20 years.

It employs more than 3,600 people worldwide in more than 50 subsidiaries around the world and 29 branches in China. ZKTeco has several development, design and innovation centres in Spain, India and in the cities of Dongguan, Xiamen and Dalian. At present, ZKTeco's techniques and intelligent terminals have been applied by most of the world's top 500 companies, and its business has now spanned more than 100 countries and regions.

ZKTeco has been gaining global recognition since its inception and is focused on changing the world through technology together with its partners.

Our values

RESPONSIBILITY

Responsibility is the way we do things, taking responsibility for the consequences of our own actions or deeds.

INTEGRITY

The second is integrity and we can say that it is related to honesty, to respect for others, to firmness in the way of doing things.

BE REALISTIC

It is a term that means dealing with situations and ideas in line with what is currently happening or what is happening in a real environment.

EXCELLENCE

It can be defined as a virtue or a quality of doing things with a quality above the norm.

Advantages for the partner

Secure

Control

Intuitive

**Always up to
date**

**No surprises
on the bill**

Secure

The GoViewCloud platform is hosted on Microsoft Azure, which performs copies of the automatic security system to ensure the protection and recovery of data.

By not requiring any specific software or computer for management, we prevent any computer virus or hacking element from having the possibility of violating our installation and endangering the customer's data. Benefit from free updates where security measures are also updated automatically. A safe and flexible solution for changes in the future.

Control

The GoViewCloud platform breaks with traditional NVR architecture. Basically, the solution allows video data to be monitored from virtually anywhere and without the need to install any special software.

It also allows remote management, by This means that cameras can be configured, updated or serviced remotely, reducing the need for in-person visits.

The platform puts control at your fingertips at a time when teleworking is booming. You will be able to offer your services using the tools developed to meet the needs of its customers.

Intuitive

Our cloud-based surveillance system is developed to be an intuitive and user-friendly tool for the installer, where the implementation, configuration and control of the platform is done in a simple way with easy to follow steps.

The GoViewCloud video surveillance platform is a solution that allows partners to manage all their installations at a glance, with the ability to store, screen and manage visual data using the service.

Additionally, you can easily add ZKTeco cameras to your installation by scanning the QR code that will automatically link the platform with the different cameras required.

Take advantage of the various training and support tools that ZKTeco provides to its partners, with the guarantee of a leading manufacturer in the security sector.

Always up to date

Thanks to cloud technology, the GoViewCloud platform is updated in the background, ensuring that your installation is always updated to the latest version. In addition, being in a web environment, the new functionalities that ZKTeco develops will be included so that you can use them automatically once they have been implemented on the platform.

Apart from updates, bug fixes are also done in the background, so that a high level of security and usability is guaranteed within the platform and you can provide the right service to your customer.

Subsequently, do you require new devices to be added to the installation? No problem. GoViewCloud can be adapted and expanded whenever you want, reducing management time with your customer. The system grows with your organisation and is future-proof.

Forget about keeping an eye on operating system versions, browsers or other applications that over time require updating and lead to compatibility problems.

Always up to date so you can focus on your business.

No surprises on the bill

Thanks to the GoViewCloud platform, you will always have predictable costs due to the purchased service. There are different types of service storage where you pay only for what you need.

Low upfront investment required by eliminating video recording devices (NVRs) and easy access to the different types of chambers, providing full transparency of the associated costs to its customers. Predictable costs for planning your business with no surprises on the bill.

The logo for ZKTECO features the letters 'ZK' in a bold, black, sans-serif font. The letter 'T' is a vibrant green and is positioned between 'ZK' and 'eco'. The letters 'eco' are in a smaller, italicized, green, sans-serif font. The entire logo is centered horizontally against a background of light gray, stylized cloud shapes.
