

## How to Choose the Right Armatura One Software Version

### For New Customers:

If you are a new customer, start with version 4.0.1.

### Existing Customers:

- **License ID Starts with 1:** Use software version 3.x.x.
- **License ID Starts with 200:** Use software version 4.x.x.x or higher.

### Finding Your License ID:

If your license ID is not visible in the license file name, open the license file with a text editor like Notepad. The ID will be listed within the file.

```
<?xml version="1.0" encoding="UTF-8"?>
<xmlInfo>
<id>
20002840
</id>
<dns>

</dns>
<license>
<module>
<id>16</id>
<serialNumber>                               </serialNumber>
</module>
<module>
<id>17</id>
<serialNumber>                               </serialNumber>
```

**General Rule:** If you do not have a license always choose the latest version available on our website.

### Additional Tips:

- Visit Armatura One's official website or documentation for the most current information and compatibility details.
- If you are still unsure which version to use, contact Armatura One's support team for assistance.

**Note:** The specific steps for finding the license ID within the file might vary slightly depending on the exact file format and Armatura One version. If you need further help locating the ID, do not hesitate to reach out to Armatura One's support.
