

## iClock 560

### Fingerprint Time & Attendance Terminal

iClock 560 is the perfect solution for small and middle installations. It incorporates fingerprint which working together with new Push SDK offers a complete solution for cloud systems. The color TFT display makes easier to all users an easy menu management.

The firmware of iClock 560 has been updated to the New Firmware. It brings many new experiences, including the stunning GUI, rock-solid stability, fast matching speed and expandability.

## Features

### Remarkable user experience

- Intuitive and stunning UI designed with the most popular and internationalized factor.
- Interface operation adopts modularized hierarchical design. Simpler, better and more logical.
- Faster matching speed: less than 0.5 second.

### Enhanced features and performance

- User validity settings.
- Data backup and retrieve.
- Advanced User ID consisted of letters and numbers.
- Chip encryption for firmware protection.
- More flexible menu configuration: double line text display.

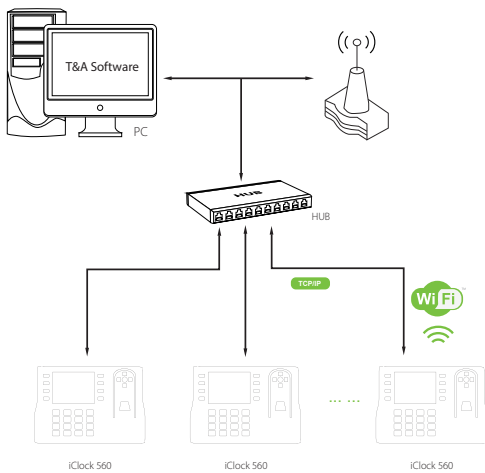

### Excellent expandability

- Easy to extend functions and customize customers demand.

# Specifications
