

Series ProFast

Electromagnetic lock latch

The ProFAST closure system is a novelty product comprising of an aluminium frame which is mounted on the door and another on the door frame to which two embedded electromagnetic locks are installed. Once mounted it opens through an integrated door handle and when closed, the profile with the suction cups is completely hidden by the door profile. This system can be quickly and easily installed (10 minutes) and the finish is modern and aesthetic with wires hidden inside the frames. This solution is suitable for offices, shops, public buildings, etc. and for all types of doors (wood, metal and glass) and can operate from 12 to 48V giving the facility a holding force of up to 600 Kg .

- Very fast installation
- Latch assembly
- Easy installation
- For doors of metal, wood and glass
- NFS 61-937 certified
- Anti -vandalism

Technical Features

Height	2190 / 2500 mm
