

SilkFP-101TA

Time Attendance Terminal

With innovative fingerprint verification algorithm, the Z-ID fingerprint reader processes quick and precise identification of wet,

dry and rough fingers. Infrared sensation technology enables accurate fingerprint sensing and auto-activation to save power.

Features

- Latest Z-ID Fingerprint Reader precisely identifies wet, dry and rough fingerprints
- Infrared Auto fingerprint sensation and activation to save power
- Good operation under strong light source with Anti-glare technique
- Fits with Governmental facilities, factories, construction sites, financial bodies and institutional facilities
