

WDMS

Powerful Web-based Data Master System Middleware

WDMS is Web-based Data Master System, an advanced middleware.

As a middleware, **WDMS** allows you to deploy on servers and databases for devices and transactions management.

Administrators can access **WDMS** anywhere by the browser or a third-party software by API to handle thousands of devices.

At the same time, its new MTD module will ensure that every employee entering the work area is healthy.

Features

MTD Module

Employee Resign

Bio-Photo Management

Device Communication Settings

Database Backup & Restore

Transaction Auto Export

Email Settings

FTP Settings
