

## 1.Precautions When Upgrading ZKBio CVSecurity

1. ZKBio Security V5000 3.0.0\_R (except Video and VMS modules) can be upgraded to ZKBio CVSecurity.

2. ZKBio Security 3.2.0.0 cannot be upgraded directly to ZKBio CVSecurity.

| Current Version             | Upgrade Path  | Upgrade Method  |  |
|-----------------------------|---|---|--|
| ZKBioSecurity 3.2.0.0_R     | ZKBioSecurity V5000 4.1.R > ZKBio<br>CVSecurity 6.0.0_R | 1. Using ZKBioSecurity V5000 4.1.x_R migration data function to upgrade from 3200 to V5000 4.1.x_R; |  |
| ZKBioSecurity V5000 2.0.x_R |   | 2. Then overwrite installation with ZKBio CVSecurity 5.3.0_R  |  |
| ZKBioSecurity V5000 3.0.x_R |   |   |  |
| ZKBioSecurity V5000 4.0.x_R |   | $\nu_{x}$   |  |
| ZKBioSecurity V5000 4.1.x_R |   |   |  |
| ZKBio CVSecurity 5.0.0_R    | ZKBio CVSecurity 6.0.0_R                                | Using overwrite installation method with ZKBio CVSecurity   |  |
| ZKBio CVSecurity 5.1.1_R    | ZKBIO CVSecurity 6.0.0_K                                | 6.0.0_R   |  |
| ZKBio CVSecurity 5.2.0_R    |   |   |  |
| ZKBio CVSecurity 5.3.0_R    |   |   |  |
| ZKBio CVSecurity 5.4.0_R    |   |   |  |

Overwrite installation method: When installing with the latest version of ZKBio CVSecurity, click Overwrite Installation when prompted, and then the original version of data will be updated to the latest version

## 2.ZKBio CVSecurity V6.0.0\_R Key Update

| No. | Module                           | Function  | Update content description   | User Guide  |
|-----|----------------------------------|---|--|---|
| 1   |                                  |   | Newly added support for uploading BioPhoto, separated from User Photo  |   |
| 2   | Personnel                        | BioPhoto  | Supports batch import of Biophoto  | Biophoto.docx   |
| 3   |                                  |   | Supports viewing of Biophoto   |   |
| 4   | Parking                          | Added field for parking time  | Real-time monitoring, reports, and API now support parking time field  | /   |
| 5   |                                  | Real-time monitoring supports live  | Supports preview before remote door control  |   |
| 6   | Access Control                   | preview of doors  | Supports live preview of doors when clicking on the door icon in the map center  | _Video View.docx  |
| 7   | Time&Attendance                  | Added support for more attendance report types  | Added support for more types of attendance reports, a total of 19 are supported  | /   |
| 8   |                                  | Language self-translation and import  | Provide translation platform for users to translate languages by themselves     Support self-service import of translated language packages in the console   | ZKBio CVSecurity Language<br>Proofread Manual-                            |
| 9   | System                           | Supports Two-Factor Authorization<br>login  | 2- Custom reports, support sending daily attendance reports"   | 2FA Login.docx  |
| 10  |                                  | Multi-server  | Supports two-factor authentication login to enhance login security   | .Multi-Server.docx  |
| 11  |                                  |   | System Management Supports configuring global message linkage in system modules  |   |
| 12  |                                  |   | Supports real-time sending of personal access records to the person who gen<br>them (via SMS, Email, WhatsApp)   | erated  |
| 13  |                                  |   | Supports sending notification messages to designated personnel after linkage trigger (SMS, Email, WhatsApp, Line)  |   |
| 14  |                                  |   | Muster Point: when an emergency occurs and the Muster Point is activated, a notification of "Emergency Assembly" is sent to all employees in the departm Access Control Module SMS_Email, Whatshep)  | ent (via  |
| 15  |                                  |   | Muter Point: supports sending statistical reports on emergency assembly on a regular basis to designated personnel (via Email)   |   |
| 16  |                                  | *   | Regularly sends daily or all access event reports to designated personnel (via   | Email) ZKBio  |
| 17  |                                  | ***   | Sends messages to designated personnel when an access event occurs (via Er<br>SMS)   |   |
| 18  |                                  |   | Supports sending personal attendance records to the corresponding individu SMS, Email, WhatsApp)  Time&Attendance Module   | als (via  |
| 19  | Global Message                   | Optimized inter-module message  | Regularly sends attendance reports to designated personnel (via Email)   | 7777 CVG VG 0.0.1   |
| 20  | Notification                     |   | Elevator Control Supports sending notification messages to designated personnel after linkage trigger (SMS, Email, WhatsApp, Line)   |   |
| 21  |                                  |   | Supports sending personal access records to corresponding individuals (via Si<br>Email, WhatsApp)  |   |
| 22  |                                  |   | Supports sending notification messages to designated personnel after linkage trigger (via Email)   |   |
| 23  |                                  |   | Supports sending personal access records to corresponding individuals (via Si<br>Email, WhatsApp)  Supports sending notification messages to designated personnel after linkage<br>trigger (via SMS, Email, WhatsApp, Line)                    |   |
| 25  |                                  |   | Supports reminding patrol personnel before the start of video patrol tasks (video Surveillance Supports sending notification messages to designated personnel after linkage  |   |
| 26  |                                  |   | trigger (via SMS)  |   |
| 27  |                                  |   | trigger for intelligent analysis (via SMS, Email, WhatsApp)  |   |
| 29  |                                  |   | Visitor Supports sending messages to designated personnel after alarm linkage trigg  |   |
| 30  |                                  |   | SMS, WhatsApp, Email, Line)  Supports sending notification messages to designated personnel after linkage trigger for visitor booking, booking timeout, registration, check in, c  |   |
| 31  |                                  |   | out, late check out, watchlist, etc. (via SMS, Email, WhatsApp)  Newly added permission management for video preview, PTZ control, snapshot, playback, partial expansion, and voice intercom   |   |
| 32  |                                  | User Permission Management  | Newly added permission management for video playback, video download, snapshot, partial expansion, and voice intercon  |   |
| 33  |                                  |   | Fine-grained management of main NVR functions and IPC camera functions is added  |   |
| 34  |                                  |   | If the grained management or main NVK functions and IP. Camera functions is added  All page permissions are fine-grained to the third-level sub-function management (such as the add, refresh, and edit buttons in a page)                     |   |
| 35  |                                  | Menu Adjustment   | Au page permissions are line-grained to the fund-level sub-function management (such as the add, refresh, and edit outtons in a page)  Accompanied by menu page adjustment of ZKNVR main device to ensure consistency with ZKNVR configuration |   |
| 36  |                                  | Device Management   | Accompanied by menu page adjustment of ZA NVK main device to ensure consistency with ZA NVK consiguration  Newly added support for connecting ZK 16/32-channel dual-disk standard NVR hardware   | TV Mileseless 5 TVT - TV  |
| 37  | Compand M. J                     | Video Playback  | Newly added support for smart retrieval with human and vehicle characteristics filter; the target video can be quickly retrieved and marked in diffe   | ZK_What's New For ZKBio CV<br>Security 5.4.0 R_v2.0_20230<br>rent 428.pdf |
| 38  | Smart Video<br>Surveillance      |   | colors via ZKNVR  Configurable linkage alarm to be displayed on the splicing wall window; once triggered, can be automatically displayed on the splicing wall, realizi   |   |
| 39  | window roaming (with ZK decoder) |   | window roaming (with ZK decoder)  Newly added support for BiSense series intelligent analysis function linkage with alarm and access control bidirectional linkage   |   |
|     |                                  | Intelligent Analytics   |  | _   |
| 40  |                                  | Newly added support for linkage alarm decoding and display on wall configuration, camera selection and wall display time can be selected  Newly added support for object detection alarm, intelligent motion detection alarm with human and vehicle characteristics; region detection intelligent alarm with human and vehicle characteristics; target counting intelligent alarm with human and vehicle characteristics; target counting intelligent alarm with human and vehicle characteristics; target counting intelligent alarm with human and vehicle characteristics. |  |   |
|     |                                  |   |  |   |
| 42  |                                  | Log   | Supports switch control of CU request, as well as client request logs  | Only cups - tile if his fi  |
| 43  |                                  | Add UNVIF Device Inirg-party www.is supported to connect to the platform for basic video management via Unvir protocol, which currently supports only preview   |  | Only supporting onvif NVR for preview.                                    |
| 44  |                                  | C/S Client  | The client supports preview, playback, electronic maps, alarms.  | Contact Popy or Mac   |
