

AQD-H35

ZKTeco

Multifunctional Air Quality Detector

Overview

AQD-H35 This easy-to-carry air quality tester can help monitor air quality at home, in the car and in hotel rooms and allows you to take timely measures to keep the air quality within safe levels. If you want to know about your air rack temperature, humidity, carbon dioxide (CO₂), in your space, this is your best choice. This air quality monitor has a built-in fan to quickly draw in ambient air to allow real-time measurements. It ensures CO₂ rates are maintain within the best indicator to avoid potential virus transmission indoors.

Features

- Common Screen display
- Test variables: Carbon dioxide (CO₂),temperature,humidity
- Large 2000mAh capacity Lithium battery
- 5V Micro USB charging
- Low battery warning

Specifications

CO2 Detection Technology	Infrared (NDIR) PM2.5
Sensor technology	Laser Scattering
Temperature unit	Celsius /Fahrenheit Switch
Detection range:	CO2 (400-5000ppm)
Power Source	Lithium battery with 2000 mAh capacity
Power charging	5V DC via micro USB port
Power cord length	123cm
Main screen displays	Power, CO2
Alarm triggered	At 1000ppm
Alarm time	Two beeps (keep beeping if the value keeps rising)
Material	ABS
Product Size	90*90*50MM
CO2 Sensing module	HEIMANN sensor from Germany
Chip	Arteryel
